## DETAILED ACTION

### *Drawings*

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "an LED lamp" of claims 1 and 2 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

3. The disclosure is objected to because of the following informalities: "seat 2 has tenons 10" in line 11 of page 3 should be changed to --cover 1 has tenons 10--.  
Appropriate correction is required.

***Claim Objections***

4. Claims 3-5 are objected to because of the following informalities:  
Claims 3-5, in the preamble, "as claimed in 1" should be changed to --as claimed in 2--; or their preamble are not matched.  
Claim 3, "the seat" in line 2 should be changed to --the cover--.  
Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:  
A person shall be entitled to a patent unless –

Art Unit: 2875

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by H.J.

Claspy et al. [US 2,269,182].

Regarding claims 1 and 2, H.J. Claspy et al. discloses an LED lampshade having a deformable cover [13] with two tenons [14], a seat [10] with two trenches, an a groove for locating an LED lamp [8a, other type of lamp] (figures 1-3, page 1 left column lines 4-5).

Regarding claim 3, H.J. Claspy et al. disclsoes a cover [13] with 2 tenons [14], each tenon being formed as a hook and a stopper [14a] at upper side (figures 1-3).

#### ***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over H.J.

Claspy et al. in view of Lautzenheiser [US 5,287,259].

Regarding claim 5, H.J. Claspy et al. disclsoes a cover [13] but does not disclose an aluminum sheet being embedded into the cover for enhancing the structure strength of the cover.

Lautzenheiser discloses an aluminum sheet being embedded into a cover [reflector] for enhancing the structure strength of the cover (abstract).

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the cover of H.J. Claspy et al. with the aluminum sheet as taught by Lautzenheiser to enhancing its strength for purpose of increasing safety while shipping.

#### ***Allowable Subject Matter***

9. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. The following is a statement of reasons for the indication of allowable subject matter of claim 4: a seat has a corresponding elastomer with a corresponding seat notch aside each trench.

The limitations discussed above are neither disclosed nor suggested by the prior art of record.

#### ***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Agabekov [US 4,858,088] discloses an U-shape cover.
